### Audiometric Booths

Eckel Audiometric Booths are the most practical and economical units available - high quality audiometric booths specially engineered to provide outstanding acoustic performance. The advanced design features cam-lock construction, which provides flexibility in moving, storing, and shipping.

The cam-lock design ensures that acoustic integrity, durability and utility remain intact. No other audiometric booth on the market offers this superior construction and quality. The booth is delivered assembled, ready to use. The knock-down packaging is offered as an option or for bulk export shipping.

The flush-mounted entry door with continuous magnetic seal allows the person being tested to enter and exit easily. Lighting, carpet, vibration isolators (heavy duty casters are optional), four universal 6.3 mm jack panel, and forced air ventilation are all standard.
